

Percy has been in service for us for several years, serving as the back-up bull in the Ambrose breeding group. Percy is a royal yak who also carries one copy of the imperial nose gene. We've been delaying his registration until the new DNA test became available so that we could scientifically verify these interesting royal and imperial genetics.

We've decided to reconfigure our breeding groups, and Percy really no longer seems to have a place – each of the new breeding groups has several of his sisters, therefore Percy is for sale. We've submitted his registration materials, he'll be registered using the best available DNA test. We expect the results back in February 2021.

Percy is a very calm yak. He is easily managed, and will eat from your hand.

Percy is the son of National Western Stock Show award winners, HSY Ambrose and HSY Persephone.
